I. INTRODUCTION

On April 7, 2015, the Farmington Board of Education approved a “*Statement of Need*” regarding the Farmington High School (FHS) renovation project in compliance with Farmington Town Code Section 53-2 and directed the administration to begin planning a renovation of appropriate and necessary school space to accommodate the needs identified in the document. The *Statement of Need* was developed as a result of the Farmington High School Facility Review conducted by TECTON Architects in February 2015. This review included interviews with administration, faculty and students, multiple observations of existing conditions, age of equipment, facility, review of history of site, building and additions, analysis of energy efficiency and options for improvement. The Tecton study also reviewed existing and recent reports including those conducted by OCR and NEASC, as well as an Acoustic, Auditorium and School Safety Report.

On January 12, 2016 the Farmington Town Council appointed the Farmington High School Building Committee to oversee a formal review of the *Statement of Need*, prioritize those needs and develop a plan to address such needs. The Building Committee engaged Colliers International, Kaestle Boos Associations and Daniel Hansen, educational consultant, to develop these Educational Specifications in collaboration with the superintendent, district, and FHS administration and staff. The following individuals participated in specific program meetings to provide input for these educational specifications:

Tim Barron, Science teacher/Robotics coach

Kyle Bridgewater, Tech Ed teacher

Katie Buckley, Drama teacher

Martha Burr, Department Leader, Library

Jeri Chamberlain, Department Leader, World Languages

Jim Corrigan, Tech Ed teacher

Jose Fontanez, Chartwells

Evan Foreman, Audio-Visual Director

Kathleen Greider, Superintendent

Tim Harris, Director of School Facilities

Leslie Imse, Department Leader, Music

Lisa Kapcinski, Assistant Principal

Vincent LaFontan, Business Administrator

Mary Lundquist, Dean of Students

Ed Manfredi, Department Leader, PE/Wellness

Andy Marshall, Technology

Margaret Mayr, Alternative School teacher

Vic Michaud, Head Custodian

Eric Misko, Athletic Trainer

Curt Pandiscio, Assistant Principal

Kristin Paye-Baker, School Nurse

Jack Phelan, Athletic Director

Caroline Presti, Math teacher

Nichole Richman, Department Leader, Social Studies

Abby Rohr, Department Leader, Special Education

Matthew Ross, Director of Technology

Veronica Ruzek, Director of Curriculum & Instruction

Julie Sawyer, Department Leader, Art

Rebecca Shomo, Department Leader, Science

Bill Silva, Principal

Laurie Singer, Director of Special Services

Brooke Stanziale, Department Leader, Counseling

Jessica Tolles, English teacher

Duane Witter, PE teacher/coach

Kimberly Wynne, Assistant Superintendent

Lori Wyrebek, Coordinator of Continuing Ed

II. FARMINGTON PUBLIC SCHOOLS CORE DOCUMENTS

The following Core Documents drive all of Farmington’s critical decision-making and planning on behalf of Farmington’s students. These documents capture the district’s values and beliefs about Teaching & Learning, and therefore have been critical in the development of these Educational Specifications for Farmington High School.

In 2010, the Farmington Board of Education adopted a set of visionary goals focused on core content knowledge as well as 21st century thinking and learning skills that would prepare all students for college, career, and citizenship in a complex global society. Farmington High School’s curriculum and instructional model has been designed to ensure that all students achieve this “Vision of the Farmington Graduate” through highly engaging, challenging, and meaningful learning experiences. Classrooms are active learning communities in which students work collaboratively and use technology as a tool for learning every day. Students are encouraged to demonstrate their learning using multiple modalities making exhibitions of student work for feedback and critique a core component of the high school program. Learning has become increasingly student-centered and inquiry-based K to 12 demanding a facility in which space is designed for self-direction, collaboration, and innovation. Farmington’s new logo and tagline, adopted in 2015, reflects the district’s continuous improvement efforts to prepare all students for their future as “Pioneers, Scholars, Contributors and Citizens.”

MISSION AND VISION

The mission of the Farmington Public Schools is to enable all students to achieve academic and personal excellence, exhibit persistent effort and live as resourceful, inquiring and contributing global citizens.

The Farmington Public Schools believe that all students are capable of acquiring the knowledge, skills and dispositions needed for productive, ethical and responsible citizenship in an evolving world community. As an innovative learning organization, the Farmington school district is deeply committed to continuous improvement. Thus, collaborative interactions among students, educators, parents, and families emphasize the importance of clear expectations, rigorous standards-led curriculum, inspired instruction, personal effort and engaged relationships leading to high levels of achievement for all learners.

VISION OF THE FARMINGTON GRADUATE © 2016 Farmington Public School District

Farmington Graduates: Reaching Global Standards of Achievement, Leadership and Citizenship

Farmington Public Schools’ Graduates will acquire an understanding of the essential knowledge and skills in the core academic content* and develop the thinking and learning skills needed to meet the challenges of local, national and global citizenship in a rapidly changing world.

Critical Thinking and Reasoning: Students access, interpret, analyze, and evaluate ideas and information, draw evidence-based conclusions, synthesize new learning with prior knowledge, and reflect critically on learning.

Communication and Collaboration: Students participate effectively in a variety of teams, actively listen and respond to the ideas of others, share responsibility for outcomes, articulate ideas clearly in multiple formats and use technology tools to enhance communication.

Problem Solving and Innovation: Students identify problems, analyze data, ask questions, utilize a variety of resources, think flexibly, make connections and seek practical, innovative and entrepreneurial solutions to a variety of problems.

Self-direction and Resourcefulness: Students explore interests, take initiative, set goals, demonstrate persistent effort, adapt to change with resiliency, and exhibit ethical leadership and responsible citizenship.

**Farmington’s Core Academic Content Areas include English/Language Arts, Mathematics, Science, Social Studies, World Language, Health, Physical Education, Wellness, Music, Fine and Applied Arts.*

FRAMEWORK FOR TEACHING AND LEARNING

The Framework for Teaching and Learning (FTL) articulates five key research-based principles for highly effective instruction. The expanded FTL document clearly describes each principle as a set of explicit expectations for

teachers and a companion set for students. These principles drive instructional improvement efforts across the district and are used as the basis for teacher evaluation.

Principle # 1: ACTIVE LEARNING COMMUNITY Students learn best when they have a sense of belonging to a positive learning community in which they have regular opportunities to work collaboratively.

Principle # 2: CHALLENGING EXPECTATIONS Students learn best when they understand performance expectations and are individually supported in meeting challenging standards.

Principle # 3: MEANINGFUL KNOWLEDGE Students learn best when they see content as meaningful and organized around big ideas and questions and can transfer learning to new contexts.

Principle # 4: PURPOSEFUL ENGAGEMENT Students learn best when they are actively engaged in authentic learning tasks and given opportunities to construct meaning and develop understanding.

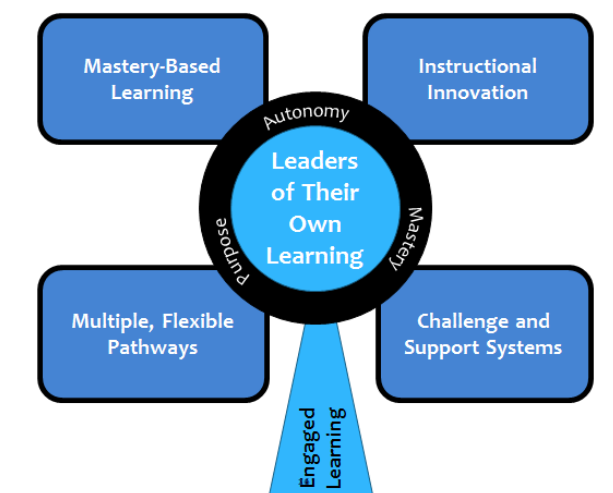

Principle # 5: INDIVIDUAL RESPONSIBILITY Students learn best when they make choices about and take responsibility for their own learning goals and progress.

FARMINGTON HIGH SCHOOL DESIGN TEAM

As a result of a 2012 yearlong study of research, data, and stakeholder feedback, a Farmington High School Design Team “think tank” comprised of students, teachers, administrators, parents and BOE members published a set of recommendations for the pervasive engagement of students throughout the high school. These recommendations will be used to inform future strategic planning as follows:

1. *Accelerate Instructional Innovation*
2. *Create Student-driven Learning Pathways*
3. *Redefine Graduation Standards*
4. *Bring the World to the Student, Student to the World*
5. *Build a Continuum of Independence*
6. *Benchmark Against Global Standards*
7. *Make Achievement the Constant, Time the Variable*
8. *Design Space for Self-Direction and Collaboration*
9. *Make Learning Public*
10. *Leverage Technology as a Tool for Learning*

A Visual Representation of the High School's Theory of How to Engage All Learners

III. PROJECT RATIONALE

Farmington Public Schools consist of four (4) elementary schools serving students in grades K-4; one (1) upper elementary school serving students in grades 5-6; one middle school serving students in grades 7-8; and Farmington High School serving students in grades 9-12.

Local Space Needs:

Farmington High School is comprised of eight distinctly different “wings” or “buildings.” The original building was built in 1928 and the average age of the other wings is 50 years old. The February 2015 Tecton Facility Report identified multiple areas of need.

FARMINGTON HIGH SCHOOL STATEMENT OF NEED

1. The Farmington Board of Education has engaged in a comprehensive school feasibility study with TECTON that included multiple observations of existing conditions, age of equipment, facility, review of history of site, building and additions, analysis of energy efficiency and options for improvement, review of existing reports (OCR, NEASC, School Safety), focus groups with faculty, administration and students, assessment of education space needs and conceptual solutions to address needs.
2. Farmington High School’s existing square footage is 218,000 sf and with the 2016 enrollment projections from the Board of Education’s 2014 approved enrollment report requires 222,202 sf.
3. The FHS NEASC study summary highlights a need to improve travel distances for faculty and staff, improve circuitous and crowded corridors and intersecting/converging students and faculty, create informal collaboration spaces for students, faculty and staff, address building systems for a controllable interior environment and address accessibility to interior and exterior areas.
4. Several spaces at FHS do not meet ADA requirements as outlined by the OCR report issued in 2013-2014, including but not limited to the auditorium, stage, music instructional spaces, some classrooms, outdated chair lift in the weight room, media center, bathrooms, portions of 2nd and 3rd floors of 1928 building, culinary space, and outdoor athletic facilities.
5. The FHS Safety and Security Study highlights accessibility issues (23 separate entry points to building), sight line issues, public/private use of building, inadequate interior and exterior lighting levels, building orientation difficulty and various issues around the multiple additions.
6. Farmington High School (FHS) has experienced several additions over many years, with an aging 1928 building in need of significant renovation as well as several additions with an inefficient building envelope impacting energy costs and efficiencies (insulation, façade, windows—except for 900 wing) as well as aging mechanical, electrical, plumbing, fire alarm and protection building systems not in code compliance.
7. Farmington High School system energy performance is lacking with a \$393,000 cost per year and in need of a “Green Design” (new or renovated MEP systems could save an average of 35% of annual costs or 140,000 per year—could realize a 45% savings depending upon solution).
8. The auditorium (poor acoustics), cafeteria, and library are undersized, impacting high school scheduling, educational programming as well as state and federal requirements on food services.
9. The additions have primarily addressed enrollment increases, but have resulted in a very large, inefficient facility footprint impacting not only energy costs, but security, insufficient student classroom space, a need for students to travel outside the building to travel to classes (696 student cross intersection between classes 9 times per day and 1070 feet from one side of the building to another), significant hallway congestion, inadequate use of space (30% unused space), a lack of space for robotics, lack of space for whole school staff professional learning and collaboration as well as constraints on educational programming for students.
10. With current and emerging educational requirements and demands on comprehensive high schools, FHS is in need of an efficient, functional, flexible learning facility that meets state and federal requirements and serves the diverse needs of all students.
11. The current parking is inadequate and requires expansion to accommodate the school and public use of Farmington High School’s building.

The Board, therefore, directs administration to begin planning a renovation of appropriate and necessary school space at Farmington High School to accommodate new MEP needs, educational programming needs, Connecticut school safety expectations, NEASC standards and OCR/ADA regulations not currently being addressed in their entirety:

- Increase square footage aligned to enrollment projections (see #2 above)
- Maximize square footage for educational programming (see #3, #9, #10)
- Create multiple levels to the building to address inefficient sprawl and “maze” like building to increase classroom space, space for robotics and other current and emerging learning spaces (see #3, #9, #10, and #11)
- Undersized auditorium (acoustic issues), stage cafeteria and media center (see #8)
- Address multiple ADA compliance issues (see #4)
- Address Mechanical, Equipment and Piping (MEP) code compliance issues (see #3, #6, #7)
- Address Security compliance issues (see #5)
- Address overcrowded Town Hall office space as well as off-site Farmington Alternative High School space needs (#9)

LEARNING SPACES OF TOMORROW:

The following design qualities emerged as essential elements of the ideal learning environment:

Collaboration---Technology----Engagement---Sustainability

1. Light – open spaces, visibility, connection to the outdoors, and natural light;
2. Flexibility – furniture and spaces that are multi-purpose, adaptable, moveable;
3. Independence – space that fosters persistence, self-direction, choice and curiosity;
4. Collaboration – places where students can interact and spontaneously work together, share ideas and work products
5. Reflection – furniture and spaces that offer quiet places for contemplation and introspection;
6. Creativity – a technology rich, imagination rich environment to foster a maker mindset;
8. Exhibition – public places for work in progress and final products to be displayed and presented for feedback and critique; and
9. Relationships– a school that is safe, warm, welcoming and nurturing of all learners These design qualities may be used to guide our thinking as we look forward into the future of our school facilities here in Farmington.

Educational Needs:

Farmington’s Core Documents have driven the programming meetings, which provided valuable input to these educational specifications. These specifications seek to provide educational spaces that function at a variety of scales and that create a sense of belonging for all students and staff with regular opportunities to work collaboratively. The intent is to “make every aspect of the school environment available for learning, blurring the edges between the various instructional spaces.” [*Facilities for 21st Century Learning*”; DoDEA]

The Farmington High School organizational structure offers students a wide variety of challenging, meaningful opportunities allowing for choice and personal responsibility. A critical component to the high school’s organizational structure is the 9-period daily schedule. This schedule provides the opportunity for students to take a wide variety of courses. This schedule also reduces scheduling conflicts, maximizes the use of instructional spaces, and allows for smaller class sizes. Most importantly, the 9-period day allows for all teachers to meet in collaborative teacher teams twice weekly for each course they teach. This is the highest leverage strategy for ensuring quality of curriculum, instruction, and assessment.

The future Farmington High School facility is envisioned to be used as a learning resource for curriculum, instruction and programming. Various learning kiosks, both stationary and movable, will be stationed around the facility to engage students and staff with current, relevant data about their school environment.

Programmatic changes within the proposed facility:

The new Farmington High School will be organized into six (6) Learning Communities or Pods. Each Learning Community will be interdisciplinary and multi-aged rather than segregated by content area. The current media center program will be conceptually transformed as a Media Center Learning Commons, which will be the “heart” of the school with multiple spaces that encourage students and staff to explore resources and work collaboratively or independently.

These specifications also offer space for an on-site space for the robotics program. A companion Educational Specifications document addresses the space needs for the Central Offices, which will occupy space within the Farmington High School campus facility and thereby alleviate overcrowded spaces at the Town Hall.

IV. THE PROJECT

Objective: To ensure all Farmington children are able to attend a school that is safe, modern, compliant with current building codes and able to support their educational program; to address issues identified in the *Statement of Need*.

The following project specifications for the new Farmington High School were developed using data from the March 2016 population study conducted by Dr. Peter M. Prowda.

School: Farmington High School

- Project Type: New Construction
 - Total Program Area: **169,983** square feet
 - Total Building Services: **58,179** square feet
 - Total Building Area (inside face of walls): **228,161** square feet
 - Total Gross Square Feet (outside face of walls): **253,259** square feet
- Design Enrollment: **1,346** students
- Anticipated Referendum: June 2017

V. ENROLLMENT AND CAPACITY DATA

Farmington High School currently houses 1,191 students in grades 9 – 12. The design enrollment for this project is 1,346 students; the maximum eight-year projected enrollment.

VI. OVERVIEW OF PROGRAMS

Farmington High School students are required to earn 22 credits in order to graduate. Each student must complete specific courses, as well as electives, in order to graduate. The required credit distribution is listed below:

Department	Minimum Credit Requirement
English	4 Credits
Mathematics	3 Credits
Physical Education/ Health and Wellness	2 Credits
Science	3 Credits
Social Studies/History	3.5 Credits
Vocational or Fine Art	1 Credit

World Languages	Passing the Farmington Language Standard Test (FLST) is required for graduation.
-----------------	--

FARMINGTON HIGH SCHOOL PROGRAM OF STUDIES

Art & Technology – The Fine and Applied Arts

The mission of the Farmington High School Fine and Applied Arts Department is to prepare students to become creative and innovative thinkers, confident in creating unique personal art and design in highly competitive real-world applications, with an awareness of contemporary visual culture and media, and a deep appreciation of contemporary, historical and global art and design. To support this mission, the department provides a rigorous and relevant curriculum that prepares students for the contemporary challenges and opportunities of post-secondary fine art programs, and the real-world design applications found in careers in the applied arts. These programs require laboratory and classroom spaces that are spacious enough to allow for collaborative work and production, each with specialized materials, equipment and storage.

Business Education

Business Education courses provide students with the skills necessary to be successful in the workplace. Courses are designed to challenge students to develop their critical thinking skills and to become self-directed learners. Students learn to navigate the relationship between consumers, workers, and citizens with an emphasis on collaboration. Students apply their acquired knowledge by engaging in activities that incorporate technology and focus on innovation and problem solving. A variety of courses are offered which provide a wide range of business topics to all students.

English

Aligned with Connecticut Core Standards, the Farmington High School English department program emphasizes the reciprocal nature of reading and writing and strives to fulfill the Farmington Public Schools goal that all students will demonstrate performance standards in critical thinking and reasoning and meet rigorous core academic content standards by accessing, interpreting, analyzing, and evaluating ideas and information, drawing evidence-based conclusions, synthesizing new learning with prior knowledge, and reflecting critically on learning. The department’s mission is to prepare students to live meaningful lives as productive and literate citizens. To realize this mission, the department offers a rigorous and relevant curriculum that provides students with multiple and varied opportunities to read, analyze, and critique quality texts; develop the processes, traits, and craft of writing; contribute to civil discourse; and engage in individual and collaborative inquiry into the habits of effective readers and writers and the elements of quality texts. Classrooms need to be spacious enough to allow for flexible adjustment of furniture to support collaborative as well as independent work.

Mathematics

Critical thinking, analyzing, reasoning, problem solving, modeling, and communication are essential skills that are developed through the study of mathematics at the secondary level. Whether plans for the future lead toward a four-year college, a two-year college, or directly to the working world, a strong foundation in mathematics is crucial to achieving these goals. The Farmington High School Mathematics Program allows students to explore theoretical concepts of higher-level mathematics while also finding and applying concepts in the world around them. Students are encouraged to focus on successful completion of the required three years of mathematics in addition to including a senior math elective in their high school experience in order to be college and career ready. Classrooms need to be spacious enough to allow for flexible adjustment of furniture to support collaborative as well as independent work.

Music

The mission of the Farmington High School Music Department is to improve students’ abilities to communicate independently through the musical processes of performing, creating, and responding in a variety of genre and audiences. These acquired skills are apparent in reading, notating, analyzing, and evaluating music. The intent is to prepare students to become citizens who participate fully in a diverse, global society and who understand their own historical and cultural heritage and those of others, within and beyond their communities, through music. To realize this mission, the department offers a rigorous, relevant curriculum that provides students with multiple and varied opportunities to perform high quality music literature that stimulates the musical processes of creating, performing, and responding. Students analyze, question, and evaluate ideas within the musical works, assume partnership and leadership roles in the classroom and community, engage in collaborative and individual inquiry into the elements of high quality texts developing the habits of thinking musicians. The music programs and performing arts require spaces that are large enough to accommodate rehearsals and performances for up to 150 students at a time. The

auditorium and stage are used as both instructional “classroom” spaces as well as for performance venues for various audiences.

Science

Farmington Public School Science program actively engages students in the practices of science and engineering in order to develop a deep understanding of the disciplinary core ideas and the crosscutting concepts. As a result, they will develop the thinking skills required to be critical consumers of scientific information related to their everyday lives, engage in public discussion on science related issues, and continue to learn about science throughout their lives. The Department’s mission is to prepare students to live meaningful lives as productive and scientifically literate citizens who are prepared to meet the expectations in college and careers by becoming critical thinkers, collaborators, communicators, problem-solvers, and innovators while demonstrating self-direction and resourcefulness. The Department’s curriculum is aligned to the Common Core State Standards, English Language Arts: Science and Technical Subjects and the Next Generation Science Standards. Students learn how to determine the central ideas of a technical text, follow precisely a complex procedure when carrying out experiments, analyze the relationships among key scientific terms and compare and contrast findings presented in a text to those from other sources, including their own experiments. Science classrooms are a combination of classroom space and lab space for hands-on exploration, experimentation, and collaboration. Additional space is required for lab preparation and storage of lab materials

Project Lead the Way

This is a sequence of courses which, when combined with mathematics and science courses, introduces students to the rigor and discipline of engineering. Those intending to pursue further formal education will benefit greatly from the knowledge and logical thought processes that result from taking some or all of the courses provided in the curriculum. Classrooms need to be spacious enough to allow for flexible adjustment of furniture to support collaborative as well as independent work.

Social Studies

Courses in history and social studies emphasize the essential core understandings and skills necessary in order to function as an effective citizen in a democratic society and a globally interdependent world. Students are encouraged to work beyond the required credits to expand and deepen their core knowledge of our nation’s heritage, to understand other cultures, and to acquire important social science concepts and life skills. Three and a half credits in social studies are required for graduation. See below for required courses and sequence. Classrooms need to be spacious enough to allow for flexible adjustment of furniture to support collaborative as well as independent work.

Wellness (Health and Physical Education)

Physical and Health Education are an integral part of the total education program, and together, work to promote and empower individual student wellness. The goal of the physical education component to the wellness curriculum is the development of competence, confidence and persistence as it relates to educating students in, about and through movement to promote physical activity for a lifetime. The health component to the wellness curriculum is designed to develop a student’s health literacy by increasing their skills, knowledge and understanding of the factors and choices that promote healthy and balanced living. The wellness curriculum is aligned with the Farmington Public Schools “Vision of the Graduate” by giving students the opportunity to focus on the process of wellness in relationship to their own lives and their emerging autonomy, and to help students meet the physical, emotional and cognitive demands of a healthy and balanced life through college and career. A significant amount of space is required to support the scope of Physical Education, Health and Athletic programs including two gymnasiums of varying size, training and weight rooms, offices, and locker rooms.

World Languages

The mission of the Farmington World Language Program is for students to communicate in another language, understand and appreciate cultural differences, and participate in and contribute to a global society. Students understand how language learning can benefit their personal and professional lives. Graduates of Farmington High School achieve a level of communicative proficiency that allows them to interact effectively with others who do not speak English. Allowing them to form meaningful relationships and collaborate with people throughout a global society enriches the lives of our graduates both personally and professionally. Classrooms need to be spacious enough to allow for flexible adjustment of furniture to support collaborative as well as independent work.

SPECIAL EDUCATION

Farmington High School houses three (3) programs to meet the needs of students with significant disabilities: The Specialized Learning Center (SLC) for students with multiple disabilities; the STEP program for students with emotional disabilities; and the SAILS program for students with autism. These programs are self-contained and require specialized spaces to meet the particular needs of the students enrolled. Additionally, students with special needs who are participating in the mainstream classroom programs may receive Special Education Resource support, Speech/Language/Hearing, Social Work, Psychological, and/or Occupational/Physical Therapy services. Each of these programs require classroom spaces that allow for small group or individual instruction and that will accommodate students with adaptive equipment. Special Education and Special Services programs also require spaces for individualized testing, counseling, and confidential meetings with parents, students and staff.

MEDIA CENTER LEARNING COMMONS

The *Media Center Learning Commons* will serve as a contemporary space for what was formerly referred to as a Library/Media Center. The Media Center Learning Commons will be the “heart” of the new Farmington High School and will serve as a resource center and gathering space for students and staff to explore, investigate, research, study, and collaborate. The Media Center Learning Commons will include a circulation center where students can check out materials, and a variety of spaces for students to work either independently or within small groups. A multimedia production lab, a classroom and an application lab will also be connected to the Learning Commons. As the central hub of the school, the Media Center Learning Commons should be bright, colorful, attractive and inviting to all.

TECHNOLOGY

A contemporary comprehensive high school must be able to support wide and varied use of technology. The school’s infrastructure needs to reflect the latest in wiring and cabling, which would support current technology applications as well as future requirements. Internet access must be readily and reliably available throughout the school. Computers should support the full range of educational and operational functions within the school. A multimedia production lab and main server room will be located within the Media Center Learning Commons. Wiring within classrooms will include wired network drops and multiple electrical outlets. Classrooms will include the latest in display technology, utilizing interactive LED screens and wall mounted instructor stations. The facility will have wireless connectivity throughout using the latest standard in wireless to support the use of mobile technology. Each classroom will be equipped to support up to 50 wireless devices.

ADMINISTRATION AND SUPPORT SERVICES

Administration and Support Services include program space for the Main Office, Principal’s Office, offices for two (2) Assistant Principals and one (1) Dean of Students, and conference room. Also, within the Main Office area will be space for Attendance, Data, and Security services. As the point of entry to the school, this area should be attractive and welcoming and set the tone for a positive first impression of Farmington High School.

Adjacent to the Main Office area will be the School Counseling program offices and instructional spaces, as well as offices for Social Worker and Psychologist services. These program services will be accessible via their own entrance from the main corridor and waiting area. Counselors provide developmental counseling lessons that focus primarily on career exploration, planning and decision-making. Students have the opportunity to discover and reflect upon their values, interests and aptitudes as well as investigate various career clusters and post-secondary opportunities. The Career Center, located within the School Counseling program area, provides a range of opportunities for students to learn and apply their skills in real-world settings. It connects them with mentors in the workplace who can guide them as they begin to think about higher education and future careers. These experiences give Farmington High School students a competitive advantage as they apply to college and prepare for careers and leadership roles in the community.

Also, within the Administration and Support Services programs is the Health Clinic, which serves the needs of students and staff alike. The Health Clinic should be in close proximity to the main entrance, Main Office and Attendance services. The Health Clinic should have access to natural light and fresh air as much as is practical.

VII. CENTRAL OFFICE ADMINISTRATION

The Central Office for the Farmington Public Schools will be housed within the Farmington High School facility. Central office includes office spaces for the superintendent of schools, assistant superintendent, business administrator, director of special services, director of curriculum, director of technology, human resources coordinator, finance manager, and payroll supervisor. The superintendent and the Central Office administration are responsible for budgeting and business operations, facilities management, technology systems, human resources, special education, continuing education and high-quality teaching and learning district wide. Building-based administrators meet regularly with the Central Office administration and therefore there is a need for conference space for groups of twenty-five to thirty. The specifications for this program space are detailed in a companion document entitled, "Educational Specifications for Farmington Public Schools Central Office Administration." The Farmington High School Facility Project and the Central Office Facility Project shall run concurrently.

VIII. PROGRAM SPECIFICATIONS – Detailed Description

ACADEMIC CORE PROGRAMS

Unless otherwise noted, the standard furnishings for every classroom noted below are expected to include the following:

- Room darkening shades
- Soft color, dimmable lighting
- Acoustical insulation for soundproofing
- Air conditioning
- ADA compliant building standards
- Wireless/internet access to support at least 50 mobile devices
- Multiple electrical outlets
- Sound Field System
- Wall mount telephone
- Intercom communication with office

CLASSROOMS – GRADES 9 - 12	
SPACE: 810 square feet (each)	
NUMBER: TOTAL: Forty-two (42) classrooms	
Furniture & Equipment	<ul style="list-style-type: none"> • Comfortable chairs/desks/tables to accommodate up to twenty-four (24) students (flexible/adaptable/easily movable work stations) • Teacher desk/chair (possibly built in to counter area to save space) • Collaboration table with chairs • Bookshelves
Storage	<ul style="list-style-type: none"> • Built-in counters with shelving below around perimeter of the room • Counters to showcase student work and/or allow for standing collaborative work • Secured storage for materials
Teaching Aides/Equipment	<ul style="list-style-type: none"> • Document Camera • Interactive LED Panel (at least 75") • Wall/ceiling mounted speakers • Consider other innovative projection devices for collaborative work
Flooring	<ul style="list-style-type: none"> • Vinyl enhanced tile or flooring that allows for easy movement of furniture • Walls should be functional work spaces and for showcasing student work

CLASSROOMS – GRADES 9 - 12	
Boards	<ul style="list-style-type: none"> • Multiple magnetic whiteboards (wall-to-wall) on front and side walls • Rolling whiteboards • Bulletin boards lining the back wall
Display/Storage of Student Work	<ul style="list-style-type: none"> • Closed deep display cases in Learning Community corridors
Classroom Technology – Students <i>(each classroom)</i>	<ul style="list-style-type: none"> • One (1) chromebook cart with 30 chromebooks • Charging station for cart • The two (2) Business Ed classrooms need computer technology that supports the course software
Classroom Technology - Teacher <i>(each classroom)</i>	<ul style="list-style-type: none"> • One (1) wall mounted teacher computer • 22 inch display • DVD/Blu-ray • Wireless keyboard/mouse • Aux HDMI input
Other Requirements	<ul style="list-style-type: none"> • Consider design that would allow instruction to be visible from hallway • Moveable walls within two (2) classrooms in each of the six (6) Learning Communities to allow for flexible use of space

SCIENCE CLASSROOM LAB – BIOLOGY	
SPACE: 1,200 square feet (each classroom)	
NUMBER: Four (4) classrooms	
Furniture & Equipment	<ul style="list-style-type: none"> • Comfortable chairs/lab tables to accommodate up to twenty-four (24) students (flexible/adaptable/easily movable work stations; tables that can be locked in place) • Teacher desk/chair (possibly built in to counter area to save space)
Storage	<ul style="list-style-type: none"> • Built-in counters on one wall with adjustable shelving below • Secured storage for science materials and equipment • Project storage for student work
Teaching Aides/Equipment	<ul style="list-style-type: none"> • Document Camera • Interactive LED Panel (at least 75") • Wall/ceiling mounted speakers • Consider other innovative projection devices for collaborative work
Utility Requirements	<ul style="list-style-type: none"> • Sink, soap, towel dispenser • Retractable, overhead electrical outlets • Laminar Flow hood • Waste disposal
Safety Requirements	<ul style="list-style-type: none"> • Personal protective equipment (PPE) cabinet, • Appropriate combustion class fire extinguishers • Eye wash and emergency showers where applicable • Lab stations, sinks, fume hoods, stationary power equipment, etc. To meet accessibility standards • Per OSHA workplace standards
Flooring	<ul style="list-style-type: none"> • Vinyl enhanced tile or flooring that allows for easy movement of furniture • Walls should be functional work spaces and for showcasing student work
Boards	<ul style="list-style-type: none"> • Multiple magnetic whiteboards (wall-to-wall) on front and side walls • Rolling whiteboards • Bulletin boards lining the back wall
Display/Storage of Student Work	<ul style="list-style-type: none"> • Closed deep display case in Learning Community corridor
Classroom Technology – Students <i>(each classroom)</i>	<ul style="list-style-type: none"> • One (1) chromebook cart with 30 chromebooks • Charging station for cart

KITCHEN	
<p>SPACE: Preparation Area: 1,470 square feet Dry Food Storage: 550 square feet Cooler/Freezer: 365 square feet Ware Washing: 300 square feet Serving Area: 2,750 square feet</p> <p><i>Note "Design Report – New Facility; Food Service – Main Kitchen," Schiavone Designs, LLC, November 7, 2016</i></p>	
Furniture & Equipment	<ul style="list-style-type: none"> • Double sink preparation tables each with one (1) standard faucet and one (1) pre-rinse faucet • Slicing machine • Buffalo chopper • Food processor • 40 quart mixer • Coffee brewing systems • Small ice making machine • Upright blast chiller • Microwave oven to be located in cafeteria • Two (2) Double Deck Convection Ovens • One (1) Combi-Oven • One (1) Convection Steamer • One (1) 40 Gallon Tilting Skillet • One (1) Four (4) Burner Range • A Ware washing room will be provided, fitted with a ware wash machine with raised hood and support tables • Three (3) compartment sink assembly with drain boards for pot and pan washing; each compartment shall measure 27" x 27" x 16" deep; a pre-rinse spray assembly required at one (1) sink compartment • Hot & Cold Food Stations • Flat Hot-Top Pizza Stations • Exhibition Cooking Station • Deli Stations • Express Stations for self-serve foods and dry display snacks • Refrigerated merchandisers for bottled beverages • Frozen Yogurt & Topping Station • Cashier stations strategically located at the exit from the Servery • Mobile condiment stations to be located at the exit of the Servery
Storage	<ul style="list-style-type: none"> • As noted above
Utility Requirements	<ul style="list-style-type: none"> • Utility Distribution System with quick disconnect devices for all services • Walk-in refrigerators and freezers will require back-up generator power; audio/visual temperature alarm; refrigeration control alarm; temperature alarms to be wired to "Building Monitoring System" • Water conservation methods • Provide High Efficiency Energy Star Label Equipment & lighting • Exhaust hoods: Demand Control Ventilation Package • Consider Waste Reduction System • Temperature maintenance, water filtration and sanitation to promote food safety • Exterior in-line grease trap to conform to TOF FOG program
Safety Requirements	<ul style="list-style-type: none"> • Eyewash/drench shower located within proximity to the cooking and ware washing areas • "Industrial" type water filter(s) to filter water before it enters the Utility Distribution System, which will feed the Steamer and Kettles • Space complies with all applicable OSHA workplace standards

KITCHEN	
Flooring	<ul style="list-style-type: none"> • Architect to review with Administration and Food Service
Boards	<ul style="list-style-type: none"> • Bulletin boards, as appropriate
Technology	<ul style="list-style-type: none"> • Network drop for cashier stations • Technology to run through district IT system
Other Requirements	<ul style="list-style-type: none"> • Seryery to be designed as a “free-flow” and open landscape arrangement to allow for patron self-service • Selected doors in the food service area to be 42” wide

DIETICIAN OFFICE	
SPACE: 250 square feet (1)	
Furniture & Equipment	<ul style="list-style-type: none"> • Desk/chair per dietician • Visitor seating
Storage	<ul style="list-style-type: none"> • Three (3) lockable teacher storage wardrobe • Three (3) lockable four-drawer filing cabinet
Flooring	<ul style="list-style-type: none"> • Vinyl enhanced tile
Boards	<ul style="list-style-type: none"> • Magnetic whiteboard • Bulletin boards
Technology	<ul style="list-style-type: none"> • One (1) computer per dietician
Other Requirements	<ul style="list-style-type: none"> • Office to be glazed to the greatest degree possible

RESTROOM/LOCKER ROOM	
SPACE: 120 square feet	
NUMBER: Two (2)	

CUSTODIAL SERVICES

CUSTODIAL WORKROOM	
SPACE: 300 square feet	
Furniture & Equipment	<ul style="list-style-type: none"> • Workbench, vise, stool • Compressed air system • Chain fall
Storage	<ul style="list-style-type: none"> • Steel storage shelves • Lockable tool cabinets • Wall-mounted tool hanging system
Utility Requirements	<ul style="list-style-type: none"> • Water spigot with hose rack • Adequate electrical service
Safety Requirements	<ul style="list-style-type: none"> • PPE cabinet and first aid cabinet • Meet all applicable OSHA workplace standards
Flooring	<ul style="list-style-type: none"> • Grease resistant epoxy finish over concrete
Boards	<ul style="list-style-type: none"> • Magnetic whiteboards • Bulletin boards
Other Requirements	<ul style="list-style-type: none"> • Overhead rollup door • Direct access to outside

CUSTODIAL OFFICE	
SPACE: 150 square feet	
Furniture & Equipment	<ul style="list-style-type: none"> • Two (2) desk/chair • Workstation table • Visitor seating for four (4) • Small refrigerator
Storage	<ul style="list-style-type: none"> • Sixteen (16) lockable storage wardrobes • One (1) lockable four-drawer filing cabinet
Flooring	<ul style="list-style-type: none"> • Vinyl enhanced tile
Boards	<ul style="list-style-type: none"> • Magnetic whiteboard • Bulletin boards
Technology	<ul style="list-style-type: none"> • Two (2) teacher computers • One (1) laptop or PC for building automation • Time clock computer
Other Requirements	<ul style="list-style-type: none"> • A restroom should be in close proximity to custodial office

CENTRAL OFFICE ADMINISTRATION

The Central Office Administration program shall occupy a gross area total of 9,626 square feet of space within the Farmington High School facility. The detailed description of spaces is identified in the companion document, “Educational Specifications for Farmington Public Schools Central Office Administration.”

BUILDING SERVICES (Non-Program Spaces)

Space Description	Quantity	Square Feet
Large Group Restrooms	1	5,949
Custodial Closet	10	50
Electrical Closet	6	50
Telecommunications Room	6	64
Corridors	1	33,997
Vertical Circulation	4	400
Vertical Circulation	2	310
Mechanical/Electrical Space/Decks	1	11,729
Storage Area	1	1,700
Central Storage Area	1	580
Loading/Receiving	1	120
Restroom	1	60
Recycling Room	1	100
Outside Equipment Storage	1	540

IX. COMMUNITY USE

The community uses Farmington High School in various ways. The most significant community use is by the Farmington Continuing Education and Recreation programs that use the high school on nights and weekends throughout the year for adult and youth enrichment and recreational activities. This use consists of the gym, classrooms, art rooms, computer labs, auditorium, and cafeteria.

Other groups that regularly use the facilities after school hours include:

- Civic organizations
- Municipal boards and groups
- PTO
- Performing Groups
- Registrar of Voters
- Local Non-Profit organizations
- Booster Clubs
- Parent Groups

Facility spaces not dedicated for student use during school hours include:

- Central Office Administration program space

The school facility will serve as an emergency shelter.

X. ENVIRONMENT – SYSTEMS – EQUIPMENT

SYSTEM	SPECIFICATIONS
General	<ul style="list-style-type: none"> • Wall mounted AED’s in key locations throughout the building • Architectural provisions, including hardware, to facilitate security procedures as outlined in the All hazard Safety and Security Plan (AHSSP) • Designs that allow instruction and collaborative learning to be visible from hallways must make provisions for the creation of a safe area for security lockdowns as described in the AHSSP
Building Systems	<ul style="list-style-type: none"> • The building systems incorporated into the new construction will be designed in accordance with Connecticut High Performance Building standards, equivalent in performance to LEED Silver rating.
Heating/Cooling (HVAC) System	<ul style="list-style-type: none"> • Heating & cooling should be produced with natural gas with a boiler for heating and roof top DX cooling. Consider including Geo-thermal wells for energy efficiency. • All spaces are to receive air conditioning, but only those areas with summertime use will have the systems running year-round; all other areas will have systems set to dehumidification only during summer months. • In-line water heaters for domestic hot water shall be provided during non-heating season usage. • Energy recovery units, VFD fan systems and pumps to be utilized in the design. • Perimeter heating will be provided by fin tube radiation and the possible use of ceiling mounted radiant panels, cooled by a VAV system with each room served by a dedicated VAV box and hydronic reheat coil. • The use of “chill beams” will be considered for general heating and cooling. Designer to provide additional information on chill beam systems to Owner. • The gymnasium/auditorium and cafeteria will be served by separate variable speed air handlers. Air handlers shall include a hot water heating coil and DX cooling coils.
Climate Controls/Ventilation System	<ul style="list-style-type: none"> • Tridium

SYSTEM	SPECIFICATIONS
Lighting System	<ul style="list-style-type: none"> • Consider LED lighting throughout where possible • Efficient and appropriate natural lighting will be maximized within the facility as appropriate for the programmatic use of the spaces. • Motion sensors and dual switching will be installed in classrooms. • The use of fluorescent lights throughout, with exceptions in specialty areas. • Attention should be given to security lighting for both interior and exterior of the building. • Emergency back up will be via local battery ballasts. • The use of light shelves and light sensors for natural light to reduce electrical load shall be considered in locations where possible.
Electrical (Power) System	<ul style="list-style-type: none"> • Power to be provided by local utility company. • Consider solar roof mounted. • Distribution will include customer metering. • Auto Transfer generator
Technology	<ul style="list-style-type: none"> • There shall be a combined voice/data system with “VOIP” (Voice Over Internet Protocol) design. • The school shall have wall mounted LED panels with media controlled both locally from the teacher’s station and with a centralized media system at the head end (“DIVOS system”). • Head equipment to be housed in an MDF with 24-hour environmental control. • Horizontal cabling shall be Category 6e or contemporary equivalent. • Cable trays shall be run in corridors to support horizontal cable structure. • Fiber backbone between the MDF and IDF rooms shall be single-mode type (10GB minimum). • Fiber optical cable from street to MDF provided by LightTower
Security	<ul style="list-style-type: none"> • Clear, attractive signage inside and outside the building • Digital video surveillance of exterior/interior areas of the building with high resolution and infrared (IR) technology where applicable • Design the plan to prevent access to instructional areas of the school when community events take place in assembly areas during non-school hours. • Motion sensors shall be mounted in corridors. • Respond to future state and/or federal mandates related to security requirements for high school facilities such as the CT DAS School Safety Infrastructure Standards • “Door open” status on-screen notifications • Prox card entry system on selected exterior and interior doors • Electronic security system with keypad access control installed into the school and integrated with prox card entry system (for limited credentials) • Door locks shall have Medeco high security lock cylinders
Phone System	<ul style="list-style-type: none"> • A comprehensive, district-integrated phone system (dial-out) will be integrated into technology scope of the project, including hands-free and handle options. • Install phones in every room of the facility occupied by teachers or students at any given time, including all support and instructional spaces. • Provide Voice Over “IP” options.
Public Address	<ul style="list-style-type: none"> • The building’s public address system is comprehensive and will be addressed as part of the technology component of the project to incorporate internal building communications as well as external communications. • The PA system should be developed in conjunction with the phone, clock, data, voice and DIVOS video distribution system of the school. • Secondary access to security and public address systems will be located in the MDF/Head End Room.

SYSTEM	SPECIFICATIONS
Clocks	<ul style="list-style-type: none"> • Clocks, similar to the phone system will be integrated into the technology component of the project. • All support and instructional spaces will be included. • System to have manual override capability in the event that Daylight Saving Times are adjusted by the Federal Government.
Plumbing System	<ul style="list-style-type: none"> • Plumbing fixtures/system will be designed per current and applicable codes. • Fixtures will be self-operating • Plastic piping to be considered for domestic water and heating where possible. • Floor drains in gang toilet areas • Plumbed for full whole building sprinkler system • Separate metering for Town Grounds department irrigation system and concession stand
Fire Protection	<ul style="list-style-type: none"> • Building will be fully protected by a sprinkler system installed per NFPA 13.
Fire Alarm	<ul style="list-style-type: none"> • The building will be protected by a fully addressable analog, manual and automatic fire alarm system.
Acoustics	<ul style="list-style-type: none"> • The building will comply with ANSI S12.60-2002: Acoustical Performance Criteria, Design Requirements and Guidelines for Schools. • Suspended acoustical ceilings and/or acoustical decks will be installed throughout the building. • Corridor walls should be constructed of glazed concrete masonry units, or materials with a comparable NRC rating, and provide an adequate separation for sound control. • In specialized areas, such as media centers, appropriate acoustical treatments will be installed. • Sound field system will be provided in each classroom.
Windows/Doors	<ul style="list-style-type: none"> • Windows should be high efficiency, non-operational type with low e-glazing. • Emergency egress windows and rated doors will be installed in accordance with applicable codes. • Key fobs, thumb latches, vision panels – review with District and integrate with security section. • Door locks shall have Medeco cylinders

XI. SITE DEVELOPMENT

There will be one primary common entrance area to the building for students arriving by bus, in their own cars, or being dropped off by parents. As vehicles enter the site, student drivers will be directed to a student parking lot, and parents dropping off students will be directed through a separate drop off route from buses. Passive security measures, such as visual control of the entrances from the adjacent office area, must be planned for. Active security measures and systems will be developed with the building design. Adequate lighting for monitoring activities and ensuring safety are of paramount importance at the building entrance. Entry overhangs or covered walkways will be provided for inclement weather to the extent practicable.

Bus loading areas should be configured as a one-way drive in a direction to assure that loading and unloading of students occurs from the right-hand side of the vehicle adjacent to the building. The drive will have two lanes: one for travel, and one for stopping and unloading. The bus loading driveway should be located such that buses exit upstream of automobiles, thereby reducing delays.

Parent drop-off areas will also be configured as a one-way drive in a direction to ensure that loading and unloading of students occurs from the right-hand side of the vehicle adjacent to the building. Student drop-off and pick-up areas are to be separated from the bus loading area, and preferably should be separate from other parking lots.

Parking for staff and visitors will be developed to take the multiple uses of the building into account. In determining the size and location of the parking lots, consideration will be given to the use of the building for community access as well as student safety. ADA and other code requirements will be addressed in the design of parking.

Sidewalks will be featured around the perimeter of the school, and shall be concrete with monolithic concrete curbing. Access to the parking lots, athletic fields, bus and parent pickup/drop-off areas, and access for student

walkers will be addressed. Sidewalks should be designed to accommodate students who walk or ride bicycles to school. The number of driveways that are crossed by sidewalks should be eliminated/minimized as much as practicable.

Playfields, parking, service drives, drop-off zones and bus zones should be located to reduce the cost of connecting elements without requiring pedestrians to cross vehicular traffic lanes. The location of driveways, walkways and landscaping must permit adequate sight distances for both vehicles and pedestrians.

Site utilities and physical plant components, including drives and access roads, will be located to avoid conflict with student and vehicular traffic, as well as the planned future growth of building components.

Consideration shall be given to maximize outside spaces by creating outdoor learning spaces as well walking paths around the perimeter of the property. Landscaping will be designed to allow the school to blend with the environment as well as to provide passive cooling and windbreaks when possible. Trees and other greenery will be of a hearty variety and require little maintenance and which complement the building and site. Trees will be planted a sufficient distance from the building to avoid future maintenance problems. Consideration will be given to safety and security when placing foliage around walkways and areas of building access.

FARMINGTON HIGH SCHOOL ED SPECS SPACE SUMMARY			
Room Description	Required # of Rooms	Square Feet Per Room	Total Area (Sq. Feet)
ACADEMIC CORE PROGRAMS			
Academic Core Classrooms	42	810	34,020
Science: General/Physics	4	1,200	4,800
Science: Chemistry	4	1,200	4,800
Science: Biology	4	1,200	4,800
Science: Engineering	1	1,000	1,000
